They met new SRT ED Misti Potter. Discussed the New Hope Old 431 bridge closure
Should ask Misti Potter, SRT, to speak at BASC one day soon.

Action Review:

1. Action Jo Beth for next Vison Zero meeting date.
Did set a May 30th meeting (that was subsequently canceled)
OPEN: Will set the next meeting date soon.
2. Action Jamie to find out where speed table designs come from, where does the standard come from?
Q: Why doesn't the MUTCD contain standards for the design and spacing of speed humps and bumps?
Closed.
A: Speed bumps and humps are considered "physical features" of a roadway rather than traffic control devices (TCDs), so the MUTCD does not address the height, width, length, or spacing of the actual humps and bumps. The Institute of Transportation Engineers (www.ite.org) publishes technical guidance on criteria, dimensions, spacing, etc. of speed humps that many cities and counties use in developing their own policies for these features. The pavement markings and signs used to warn road users of the physical features of the road, such as signs and markings for speed humps, are TCDs and are therefore covered by the MUTCD.
Jennifer added: COH uses a COH paint design.
3. Action Jamie catch up with Tom Cisco for Boolean crash data and speed limits (how are speed limits determined, does the speed get looked at when bike lanes area installed?)
OPEN
4. Action Jacob put past 10 months minutes, and agenda to BASC fileshare.
DONE. Closed.
5. Action David query GIS database, see if there is historical data on speed limits.
There's not. Closed.
6. Action Jacob Plan for City/BASC Bike Ride - Remember to invite all city depts
OPEN.
7. Jamie to provide updated BASC membership list for review
OPEN.
